Genl. Description

The Lana in Township No.
23. North in Range 3 East is lure &
second rate generally - The N. & N.W. part

T. 23 N. R. 3 E. 2nd Mer. Indiana.
 chs. lks.

of the Township being Elevated from ten to twenty feet higher than the Surface of the Water in Big & Little Wild Cato. The E. & S. & N. W. parts being very near on a Level with the water courses, which bear off S. E. & E. with a slow Current. The Surface of the water in the Marshes and Ponds is very nearly on an Elevth with the Surface of the soil. The Ascent & Descent to either being scarcely perceptible.

The Soil in general is composed of Blue Clay and a small portion of Alluvial. The wet Lands & Swamps, being all Clay, which is the cause of the Marshes & Ponds, containing the water until the dry Seasons ensue.

The timber is mostly W. Oak & Beech - which frequently continues the same in the Bottom Lands to the very Banks of the water courses.

Certificate.

I, Abram C. Van Nips
 Depy. Surveyor, do solemnly swear
 that in pursuance of a Contract
 dated the Twentieth day of May 1846
 with Lucius Lyon Surv. Genl. of the
 United States for Ohio, Indiana &
 Michigan; And in strict conformity
 to the Laws of the United States, and
 Instructions of said Surv. Genl. I
 have regularly Surveyed and Sub-
